BLUEPRINT FOR THE HUMAN SPIRIT®
Universal Perception of Duality – Separation from Source

All fear is based on the universal perception of duality, the belief that we are separated from Source. Duality becomes apparent in every aspect of life as the false sense of self, or the Ego. It compensates for alleged fears and limitations with goals, attachments, emotional reactions, attitudes and behaviors. The human experience provides opportunities for learning and growth, resulting in the shifting of perceptions and actions from ego-driven effort to that of awakened-being. Through this transformative process it is possible to embrace divinity, tap into our unlimited inheritance, express spiritual power and realize oneness with Source.
